

Working Together for a Cleaner Future

ScottishPower and Shell have over 70 years' combined experience in Scotland's offshore environment, including another 50 years' experience offshore in the North Sea. We also have over 15 years of combined experience in floating offshore wind energy.

As world-leading energy developers, we bring together decades of experience working offshore, a long history of working in Scotland, and an innovative approach to delivering offshore energy projects.

About ScottishPower

ScottishPower is part of Iberdrola Group, a global energy leader and the number-one producer of wind energy. Responsible for progressing Iberdrola Group's renewable energy projects in the UK, ScottishPower manages the development, construction and operation of windfarms throughout the world and currently has over 40 operational windfarm sites generating over 3 gigawatts (GW) of renewable energy.

ScottishPower continues to be one of the leading renewables developers in the UK and is investing almost £3 billion between 2023-25 across offshore and onshore wind and solar generation, increasing home grown green electricity generation in the UK to support energy security.

ScottishPower is the first integrated energy company to generate 100% green electricity in the UK. Focused on wind energy, smart grids and driving the change to a cleaner, greener future, ScottishPower is investing over £8m every working day to make that happen.

About Shell

Shell has over 50 years of experience delivering complex offshore projects in the North Sea, and today employs around 1,200 in the North-East of Scotland. Floating wind is a natural extension of our capabilities in deeper offshore projects.

Shell today has more than 2.1GW of offshore wind capacity in operation and under construction across Europe, North America and Asia. Globally, Shell is building an integrated power business that will provide customers with low-carbon and renewable energy solutions.

Shell's target is to become a net zero emissions energy business by 2050.
